

# Barlow Park Board Highlights

October 2024

## Barlow Park Elementary

Ms. Hockenbrock's students were working on using non standard units of measurement- popsicle sticks, salamanders, etc. to measure different objects in our room for math. They had a lot of fun measuring each other!

Practicing their fluency by reading blending lines in phonics with partners

Mrs. Vakirtzis' Student reading to "Frank" which is the stuffed animal version of one of Mrs. V's dogs at home

## Barlow Park 4K

Mrs. Giese's class has been working hard on becoming authors, illustrators and early readers!

4K has been hard at work creating and inventing! We have learned we can use blocks to create letters and numbers, learned about height, length, and weight, and are building our conversation and imagination. Math and literacy work through play.
